

Elegance

The Best in Class Ambient Light Rejecting Screen - exclusively from Screen Excellence

Designed for integration in a living-space, **Elegance** is a sleek borderless projection screen. Its edge-free design allows a refined touch of aesthetics to blend harmoniously into any interior décor. To meet the needs of projection in an uncontrolled lighting environment, the screen surface is Ambient Light Rejecting. This enhances the image contrast under normal use.

The neutral grey Ambient Light Visionaire 0.8 A.T. projection surface is also Acoustically Transparent.

This allows the proper location of the three front loudspeakers behind the screen. It is the most desirable system layout both visually and performance wise.

Sound transparency and high-contrast ambient light imaging merge with a sharp aesthetic design, the Elegance screen is the core of the best Media Room or Hybrid Room Home Cinemas.
