

True Aspect Masking (TAM 2TB)

TAM, is the ultimate fixed-frame A.T. screen with motorised masks. Your image is optimum when perfectly framed by light-absorbing black borders.

In order to achieve this exact framing for various imaging Aspects Ratios, the True Aspect Masking TB offers Top and Bottom masking. The width of the viewing area remains constant, whereas the height can vary according to the required aspect ratio.

This provides a projection surface constantly and accurately bordered with black edges, enhancing the contrast and a real focus on the image.

The TAM-TB screen is built from the same frame as the RF series (9.4 cm wide, 3.7"). A small increment in depth hides the motors assemblies- the total depth being 145 mm (5.5").

The motorized masks of the TAM Series are made from an Acoustically Transparent black fabric. The projection surface is the exclusive Enlightor Neo, the only woven Acoustically Transparent projection surface to be absolutely compatible with Ultra HD projection whatever the screen size.

The TAM screens offer the best available performances, a perfect and automated adjustment of the projection surface to the image size, silent mechanisms, and a sleek and elegant style that reveals a commitment to true luxury

Technical info:

Fully 4K and HDR compatible

Surface: Choice of woven Enlightor and solid Ambient Visionaire surfaces

Frame: High grade Aluminium frame with InfiniteBlack velvet finish

Standard Sizes:

HD up to 180" / 4572mm base width
(Surface limitations apply)

WS N/A

Custom sizes and aspect ratios available upon request

HD Aspect Ratio: 1.78:1 (16/9)

WS Aspect Ratio: 2.35 - 2.40:1

Advanced features:

- Hand crafted with care in United Kingdom
- InfiniteBlack velvet frame finish for ultra-absorbent black borders
- Silent operation
- Exclusive appearance and luxury finish
