- 2 K
Check compatibility with projector. See explanations below
- 2K
A better result can be obtained with another Enlightor fabric
- 2 K
Recommended
- 4 K
Recommended. Very high resolution

2 K = full HD resolution 1080 P (1920 x 1080)

4 K = compatible with 4K resolution (4126 x 2178)

**COMPATIBILITY ISSUES:** in Full HD 1080 P projection, some fabrics tend to produce moiré effects with some projectors within a certain range of image size. This range depends on the projector, on the distance, on a possible tilt angle of the fabric. We recommend, in the sizes range indicated in orange, to test the projector to be used on a larger screen demo screen, and to adjust the zoom to the exact size of the actual size you are planning to purchase. Then check the absence of moiré on a bright uniform picture of the required resolution ( flat colour with a logo, or test blu-ray)
