

## MOVIE PARTNER

Providing unique imaging and sound quality in professional theaters *Screen Excellence* MOVIE PARTNER fixed frame screen is the ideal projection surface.

It is the very first woven screen affording up to a seamless 610 cm (20') high projection surface based on the Enlightor 3 fabric. The cutting edge technology is embodied in the Enlightor range of fabrics, the latest one being the Enlightor 3. Fully compatible with 4K digital projection and with non-polarized 3D technologies, it is the best futureproof upgrade for theaters.

*Screen Excellence's Enlightor 3* fabric is held under permanent tension on a rigid aluminium frame. The 10 x 8 cm (4 x 3.15") section frame is structurally reinforced with vertical elements in a heavy duty modular construction.

The Enlightor fabric is either wrapped around and affixed to the frame by means of a self tensioning groove system, or traditionally tensioned via eyelets and gromets. Once locked in place its tensioning ensures the fabric is evenly supported and free of any ripples. With such attention to details the MOVIE PARTNER Fixed Frame screen guarantees a totally flat projection surface.

### MOVIE PARTNER screens offer many advanced features :

- Enlightor 3 fabric - Uncompromised image and sound quality
- No moiré effect - Ideal for use with digital projection, including 4K
- A.T woven black backing fabric - Eliminates rear wall light reflections, and maximizes contrast
- Heavy duty aluminium frame - Ensures absolute structural rigidity
- Groove tensioning system - Guarantees a perfectly flat projection surface
