

ENLIGHTOR ACOUSTICALLY TRANSPARENT SCREEN PROJECTION SURFACES

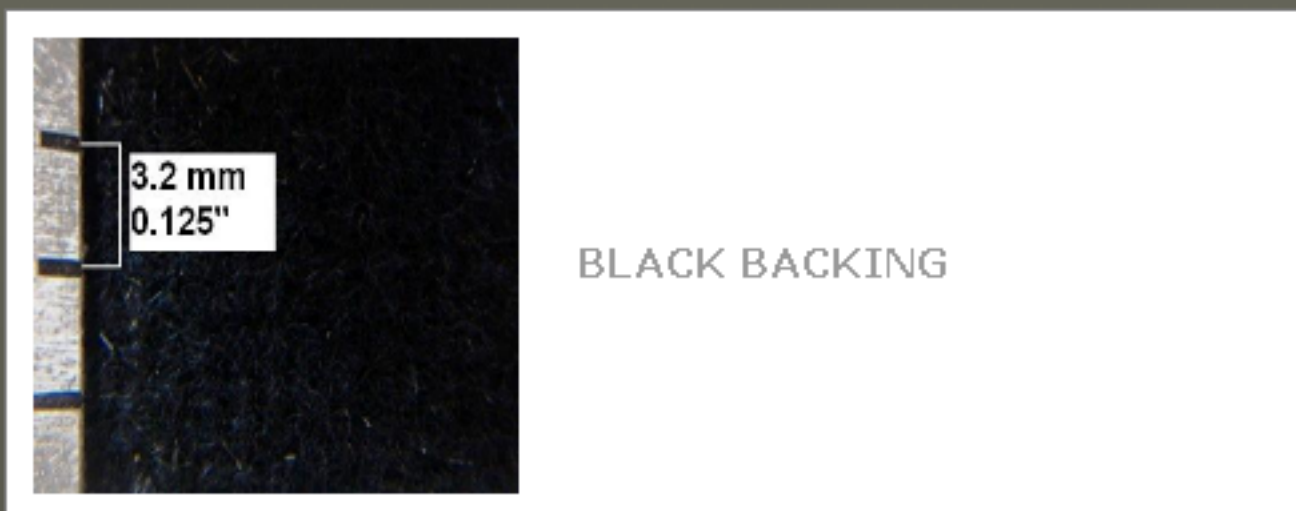

Developed to meet the needs of ultimate Home Theater designs, Enlightor projection surfaces uses a proprietary woven structures optimized to eliminate the unacceptable moiré effect produced by fixed pixel projectors when shown on conventional perforated or micro-perforated screens.

All Enlightor projection surfaces conforms to SMPTE colour balance guidelines, and offers a negligible gain loss when compared to perforated screens.

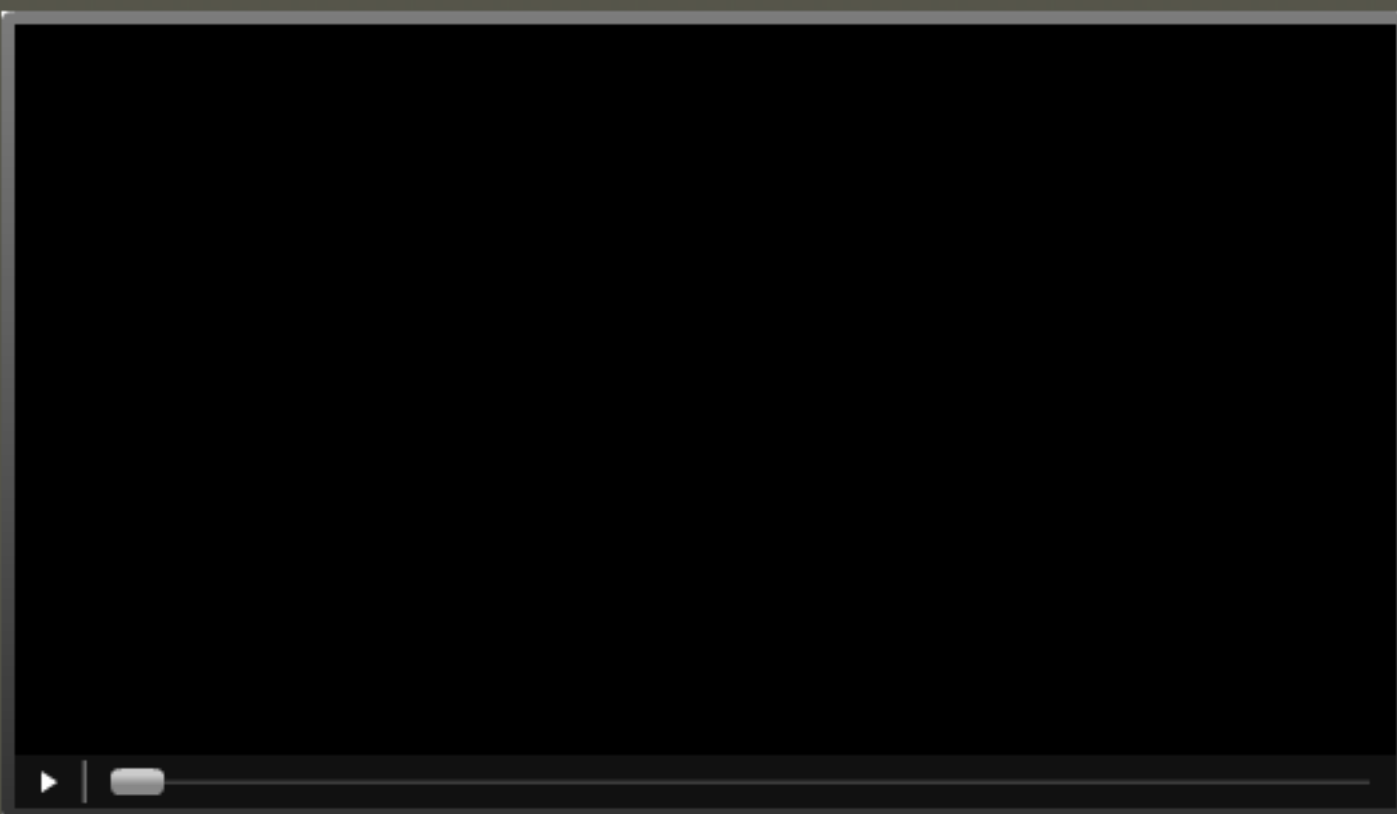

An acoustically transparent black backing material completely absorbs any rear wall reflections, whilst improving the perceived image contrast.

Screen Excellence's proprietary Enlightor screen projection surfaces are unique. They combine a vivid and uncompromising image, for any projector type, with a level of acoustical transparency unmatched by any competing product.
