

REFERENCE ELECTRIC SCREEN (RM)

A motorised rolling screen is the logical solution for integrating a Home Theater, with video projection, in a living room. Small and discrete when retracted, it provides a large projection surface whenever required.

RM screens offer the most advanced features in AT motorized screen technology: Exclusive Enlightor fabric - Uncompromised image and sound quality

- No Moiré effect - Ideal for use with DLP, LCD and LCOS as any other fixed pixel projectors
- AT Woven black backing fabric - Eliminates rear wall light reflection
- Flat projection surface - no wrinkles
- Adjustable extra-drop - Position screen image to the exact height required
- 3" Black borders - Accurate image framing and enhanced contrast perception
