

RM2-T (reference motorized tensioned) electric screens

A motorised rolling screen is the best solution for integrating a Home Theater in a living room. Small and discrete when retracted, it provides a large projection surface whenever required. The RM2-T provided with tensioned Enlightor 4K projection surface is offering a unique no-compromise solution.

Screen Excellence RM2-T is setting a world standard in retractable screens. Combining the very best existing retractable platform, developed by Chris Seymour, it is fitted with our exclusive projection surface, the Enlightor 4K fabric.

- No Moiré effect in any situation - Full compatibility with all existing projectors
- Beyond 4K resolution in any picture size
- 3D compatible with active glasses technologies
- AT Woven Black Backing fabric. Eliminates rear wall light reflection
- Absolutely flat tensioned projection surface
- 2" Infinite Black™ velvet borders - Accurate image framing and enhanced contrast perception
- Case finish options : Black Velvet coating ; Glossy colour coating
